DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a marker post, classified in class 116, subclass 209.
 - II. Claims 13-16, drawn to a process of making an integral marker post, classified in class 264, subclass 151.
 - III. Claim 17, drawn to a method of transporting and embedding an anchoring marker post, classified in class 414, subclass 788.
2. The inventions are distinct, each from the other because of the following reasons:
 - A. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed does not require the particulars of the process as claimed because it does not require extruding a post as stated in group II.
 - B. Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that

product (MPEP § 806.05(h)). In the instant case the process for using as claimed does not require the particulars of the product as claimed because it does not require the particular anchoring marker post for transporting a post as stated in group I.

C. Inventions III and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the process for using as claimed does not require the particulars of the process as claimed because it does not require the particular extruded integral marker post for transporting a post as stated in group II.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Carl Johnson on April 11, 2002 and April 16, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
